**PNP Digital Transistor**

**FEATURES**

- Built-in bias resistors enable the configuration of an inverter circuit without connecting external resistor (see equivalent circuit).
- The bias resistors consist of thin -film resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
- Only the on/off conditions need to be set for operation, marking device design easy.
- Green compound (Halogen free) with suffix "G" on packing code and prefix "G" on date code.
