8 INSPECTION METHODS

(1). Linearity

Step 1: Short RT and RL (or short RL and LL).

Step 2: Apply voltage DC 5V.

Step 3: Short LT and LL (or short RT and LT).

Step 4: Apply grounding.

Step 5: Draw points along Lx and Ly at 5.0 mm intervals within pattern area and detect the voltage at SG.

Step 6: Measure the voltage differences between RT and LT (or RT and RL) (see note 8.1 & 8.2)

Note 8.1:

Note 8.2:

$$\text{Linearity: } [V_{xm} - V_{xi}] / (V_a - V_b) \times 100\%$$

(2) Specification

Linearity must meet the electrical characteristics specified in item 6.

9 APPEARANCE INSPECTION

(1) A 17W fluorescent luminant lamp is used for appearance inspection. Detail settings are shown in notes 9.1 & 9.2.

Note 9.1:

Note 9.2:

(2) Minor impurities outside viewing area are acceptable unless their existence affect electrical functions.

(3) Glass Flaw:

Item	Picture	Specification
Corner Flaw		$X \leq 3.0 \text{ mm}$ $Y \leq 3.0 \text{ mm}$ $Z \leq T$
Edge Flaw		$X \leq 3.0 \text{ mm}$ $Y \leq 3.0 \text{ mm}$ $Z \leq T$
Progressive Flaw		Not allowed

Note: T = Glass thickness

10 ATTENTION FOR MOUNTING

(1) The gasket support of touch panel must allocate outside of viewable area. Reserve enough clearance between panel surface and enclosure for normal panel operation.

To avoid pressing error, please retain enough space between surface panel and Bezel.

(2) Bezel opening must not touch Viewable Area, Bezel opening must be designed between Viewable Area and Active Area.

(3) We recommend elastic material support.

(4) Due to the conductive characteristic of the panel backside, prevent metal contact after mounting.

(5) Proper grounding of controller at all times assure normal operation.

Note 10.1:

11 HANDLING PRECAUTIONS

Storage	Store panel under the temperature and humidity range pre-specified. Direct sunlight exposure or piling should be avoided.
Unpack	Unpack the box with the printed red arrow pointing up.
Handling	(1) Use clean sacks or glove to prevent fingerprints and/or stains left on the panel. Extra attention and carefulness should be taken while handling the glass edge. (2) Avoid touching the viewing area before installation /integration. (3) Holding the panel instead of the tail at all time.
Cleaning	(1) Use neutral detergent or isopropyl alcohol on a clean soft cloth to clean the panel surface. (2) Prevent using any kind of chemical solvent, acidic or alkali solution.
Installing and Assembling	(1) Excessive force or strain to the panel or tail is prohibited. (2) Retain at least 0.3 mm clearance between panel and display module. (3) Gasket or cushion pads around the edge of the panel may segregate water and/or dust contamination.
Operating	(1) Touch the panel with your finger or stylus only to assure normal operation. Any sharp edged or hard objects are prohibited. (2) Operate the panel in a steady environment. Abrupt variation on temperature and humidity may cause malfunction of the panel.
Others	(1) Keep the panel surface clean. Prevent any kind of adhesive applied on the surface. (2) Avoid high voltage and/or static charge.
